

Project Update

Cedar LNG is proposing to build and operate an LNG facility in the traditional territory of the Haisla Nation.

With major development milestones achieved, including receipt of all major regulatory approvals, Cedar LNG is preparing for construction, which could commence as early as May 2024, starting with tree clearing and rough grading activities at our proposed marine terminal near Kitimat.

In anticipation of activities related to project development, we want to ensure you have access to information about the project, and can reach out with questions or feedback.

About Cedar LNG

The Haisla Nation, majority owners of the Cedar LNG Project, together with Pembina Pipeline Corporation are proposing to develop a floating LNG facility within the traditional territory of the Haisla Nation. Cedar LNG will be powered by renewable electricity from BC Hydro, making it one of the lowest carbon intensity LNG facilities in the world.

We want to hear from you

Throughout construction and operation, Cedar LNG is committed to receiving and responding to community feedback through our Community Feedback Process.
