

# Project Update

## Final Investment Decision Declared

On June 25, 2024, Cedar LNG declared a positive Final Investment Decision (FID) for the world's first Indigenous majority-owned LNG facility. This historic achievement marked the culmination of years of hard work and planning by the Haisla Nation, Pembina Pipeline Corporation, and our industry partners and set the stage for decades of prosperity and environmental leadership.

Chief Councillor Crystal Smith and Scott Burrows, Pembina President & CEO sign a positive FID for Cedar LNG in Kitamaat Village.

## Construction Commences

Construction commenced shortly after FID in early July 2024, with a focus on the marine terminal area and the pipeline right-of-way, to prepare for a full construction season in 2025. In addition to site clearing work, important environmental management plans have been implemented onsite, including sediment and erosion control measures.

The innovative floating LNG unit is also under development overseas, anticipated for delivery in 2028. With peak onshore construction anticipated in 2026, we want to ensure you have continued access to up-to-date information and have the opportunity to reach out with feedback or questions. Register for updates at [cedarlng.com/contact](https://cedarlng.com/contact) or email us at [feedback@cedarlng.com](mailto:feedback@cedarlng.com).

## Proposed Design Refinements

Cedar LNG is currently pursuing refinements to its approved design based on additional detailed engineering and construction planning. These include an alternate transmission route to avoid impacts on mature trees, the addition of a distribution power line, and an increase in the marine terminal area due to changes in the mooring system.

The proposed refinements are expected to further mitigate environmental effects, while optimizing the project design. The design refinements are subject to the approval of amendments to the project's original Environmental Assessment Certificate and federal Decision Statement.

## About Cedar LNG

Cedar LNG is a floating LNG facility in Kitimat, British Columbia, located within the traditional territory of the Haisla Nation. A partnership between the Haisla Nation and Pembina Pipeline Corporation, Cedar LNG is the world's first Indigenous majority-owned LNG project. It will have one of the cleanest environmental profiles in the world, and provide unprecedented opportunities for both the Haisla Nation and the region. Construction is underway with operations anticipated to commence towards the end of 2028.

## Let's Stay Connected

We look forward to continuing our work together as we move Cedar LNG forward. Reach out with any questions or feedback for the Cedar LNG team:
