SPRING 2025

Cedar LNG continues to make great progress in the first half of 2025, on and off site! With ongoing construction, training and apprenticeship program development, community investments, and more, we are happy to share all that's been going on with Cedar LNG.

Breaking Ground, Making History

In April, Cedar LNG selected **Ledcor Haisla Limited Partnership (LHLP)** to construct the Cedar LNG pipeline that will deliver natural gas to the Cedar LNG facility from the LNG Canada site.

Haisla Nation and Ledcor established a joint venture over 10 years ago to execute projects in the Kitimat region.

"Our partnership with Haisla Nation through the Ledcor Haisla Limited Partnership (LHLP) exemplifies a shared commitment to economic reconciliation and community empowerment," notes Curtis Berube, Vice President, Ledcor. **"For over a decade, this collaboration has empowered Haisla members and local communities through meaningful employment, training, and development opportunities."**

LHLP is responsible for hiring to meet their labour needs, and they are working closely with Haisla Education & Employment to identify available and qualified candidates for pipeline construction.

Pipeline construction commenced earlier this spring, and Cedar LNG is proud to share that several Haisla members have joined LHLP to build this critical piece of project infrastructure. Construction of the pipeline is expected to be completed in Q4 2026, with other project components advancing in tandem.

LHLP crews prepare the cleared right-of-way for pipeline construction.

The marine terminal site construction is anticipated to commence in Q2 2025. Overall peak construction is expected in 2026. The development of the innovative floating LNG facility is underway overseas with the project's anticipated in-service date expected in late 2028.

Cause for Celebration

In March, Haisla community members united in Haisla Village, Kitimat, and Vancouver to celebrate last year's historic positive Final Investment Decision.

While the celebration came nearly a year after the announcement was made in Haisla Village on June 25, 2024, the excitement from all that attended was thrilling to see.

More than 350 members attended the events, and enjoyed a great meal and prizes in a festive environment. While it was a great opportunity to celebrate and share updates on the project, for Cedar LNG's partners—Haisla Nation and Pembina—it was all about sharing their gratitude with members for their support, guidance, and feedback, all key elements in making the project a success.

“With Cedar LNG becoming a reality last year, we as a Nation made history by showing the world what can be done when we work together and lead with our values. I hope, like me, you feel tremendous pride when you think about what Cedar means for our community and future generations.” – Crystal Smith, Chief Councilor, Haisla Nation

“The chance to work alongside Haisla Nation and make history together has filled our team with immense pride and a deep sense of responsibility. We’re all committed to doing everything we can to ensure this project’s success.”– Janet Loduca, Senior Vice President, External Affairs & Chief Legal and Sustainability Officer, Pembina

We extend our thanks to everyone who attended and helped make these dinners a success. A big shoutout to Posh Eaters, Keith Woods, Luso Hall, and the Croatian Cultural Centre for their great hospitality and delicious food.

Community Investment Spotlight: Kitsumkalum Wildland Fire and Emergency Response

Giving back to the community is a fundamental value for Cedar LNG. Since 2021, we have awarded over \$300,000 to support various initiatives through our Community Investment Program. We are focused on supporting the growth of sustainable communities for the long term, with priority for safety, equality, Indigenous reconciliation, and environmental sustainability. This month, we are proud to highlight the **Kitsumkalum Wildland Fire and Emergency Response Program**, an important initiative year-round, particularly as we approach wildfire season.

Kitsumkalum received a \$25,000 grant towards the purchase of a wildland fire and emergency response vehicle that will enhance Kitsumkalum's emergency response capabilities. Before the purchase of this vehicle, the Nation relied entirely on Terrace and neighbouring Thornhill for emergency fire and rescue services. A busy rail line between Kitsumkalum and Terrace often meant frequent train traffic blocked crucial access routes, causing significant delays.

With the purchase of this new vehicle, Kitsumkalum can now effectively respond to emergencies in their community, while awaiting additional resources from Terrace and Thornhill. Through this initiative, they are hosting training sessions for nearby First Nations and strengthening emergency response programs across the region. These are only the first steps towards a safer Kitsumkalum as they strive to establish their own fire and rescue department with dedicated first responders.

This funding has strengthened Kitsumkalum's emergency response capabilities and laid the foundation for continued growth. It creates new opportunities for community members to get involved in the fire service and be part of building a safer, more resilient Kitsumkalum.

"Kitsumkalum Emergency Services is extremely thankful for Cedar LNG and its generous contribution. We look forward to continuing our partnership and working together to make our community and region safer," said Liam Nutma, Kitsumkalum Fire Chief.

Through our Community Investment Program, Cedar LNG is committing to supporting the development of safe, inclusive, and connected communities. Learn more about our program and apply today at cedarlng.com/community-investment-program.

Committed to Safety

As Cedar LNG advances construction and prepares for operations, safety will always be our top priority.

Our partners—Haisla Nation and Pembina—are committed to helping improve the emergency response capabilities in neighbouring communities, because we believe we are most safe when we work together.

Introducing megúgu

Cedar LNG is pleased to announce that Haisla Nation has chosen megúgu as the name for the floating LNG facility.

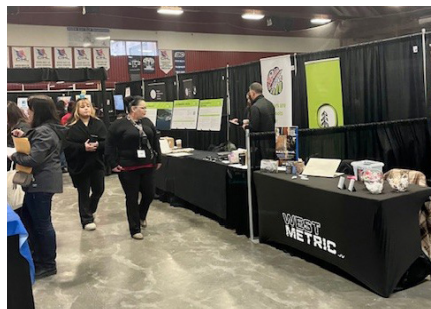

megúgu means 'Spirit of the Cedar Tree' in xa'isla. The name roots our modern-day project—Cedar LNG—in the cultural and traditional practices of Haisla Nation, for whom the physical and symbolic aspects of the Cedar Tree hold deep meaning.

It is said that long ago, one person was given the privilege of creating beautiful tools and art out of wood. A naulak^w (spirit being) appeared before Chief Legai'x̣ in the forest and guided him carefully on how to build a canoe from a red cedar tree for the first time. The naulak^w called himself megúgu.

At Cedar LNG, we are honoured to have the floating LNG vessel adorned with the name megúgu, which will ensure Haisla culture and tradition is central in all that we do.

Cedar LNG in the Community

In early May, members of the Cedar LNG team were in Terrace for a job fair hosted by Kitselas 5 Tier, an initiative of the Kitselas First Nation dedicated to building employment and skills training in their Nation and the surrounding region.

Thank you to the Elders and knowledge holders who joined us for a workshop to develop the shortlist of names for the Cedar LNG vessel.

Let's stay connected

We look forward to continuing our work together as we move Cedar LNG forward. Reach out with any questions or feedback for the Cedar LNG Team:
