SPRING 2026

2026 is an exciting year for Cedar LNG, with peak construction ahead, important community investments underway, and our floating LNG facility currently more than 50% complete. Check out what our team has been up to and what is planned for our busiest construction season yet.

## Moving Forward Together

As Cedar LNG ramps up for one of our most important construction seasons yet, our team has been focused on ensuring safety, environmental protection, and community interests are at the forefront of all that we do. One of the ways we do this is through our commitment to collaboration and transparency with Haisla Nation, community stakeholders, regulators, and neighbours.

In March, our team hosted a session with the District of Kitimat, Kitimat Fire and Ambulance, WorkSafe BC, the BC Energy Regulator, LNG Canada, and Rio Tinto to share our construction schedule, discuss environmental management planning, safety & emergency preparedness, and other important topics.

“It was great to have so many community organizations and key stakeholders come together as we prepare to launch construction,” said Amanda Zinter, BC Regulatory Lead for Cedar LNG. **“This project is built on collaboration and information sharing, so it’s always important to have time together to share our plans, hear feedback, and address questions so we can all be moving in the right direction together.”**

We also spent the evening with Haisla Members, sharing our plans and addressing community interests and feedback. We are grateful to the more than 120 Members who attended dinner and a project presentation at the Haisla Recreation Centre. Being welcomed into Haisla Village and having the opportunity to listen, learn, and connect is always a highlight for our team.

At the end of March, pipeline construction commenced for the season, with completion expected by the end of 2026. Pipeline work is being led by Ledcor Haisla Limited Partnership, with many Haisla Members working to build this critical piece of infrastructure.

Members like Grant Omejc, whose unwavering commitment to safety is supporting a safe and respectful workplace for all.

**“Respecting and looking out for one another is something I take seriously every single day,”** says Grant. **“When we come together, that shared awareness and respect are what move us all forward, while making sure nobody is left behind.”**

Over the coming months, there will be an increase in activity at the marine terminal area and the transmission line right-of-way as we prepare for the installation of electrical infrastructure that will power the floating LNG facility (FLNG) with renewable electricity from the BC Hydro grid. This includes route clearing, continued site preparation, and installation of towers and electrical lines. Overseas, work on the FLNG is progressing at the Samsung Heavy Industries shipyard in Geoje, South Korea. The vessel is more than 50% complete and scheduled to be delivered to Kitimat in 2028, prior to Cedar LNG’s estimated in-service date of late 2028.

## Meet our Apprentices

Earlier this year, four Haisla Members took their first steps towards a career with Cedar LNG as they began on-the-job training at Pembina’s Prince Rupert facility. Over the next few years, these apprentices will build their skills through a combination of in-classroom technical training and hands-on experience at other Pembina facilities. Following successful completion of the program, apprentices will graduate as a journeyman tradesperson and transition into full-time roles on the FLNG when it arrives in Kitimat in 2028.

## Meet our Team

As Cedar LNG advances, we want to make sure you can get to know our team, whether they live in the community, spend time in the field, or work out of one of our offices. In this edition of the Cedar LNG newsletter, we're profiling three talented, dedicated, and passionate women on our team.

### Brenda Duncan

**Senior Advisor, Indigenous and Community Engagement**

As the primary liaison between Cedar LNG and the Haisla community, Brenda is instrumental in ensuring Haisla values are front and centre in project planning. A proud Member of Haisla Nation, Brenda has a passion for making sure the community benefits

and thrives from Cedar LNG. Brenda brings this passion through the project's Community Investment Program, which she is responsible for implementing.

### Tara Frederick

**Training & Employment Lead**

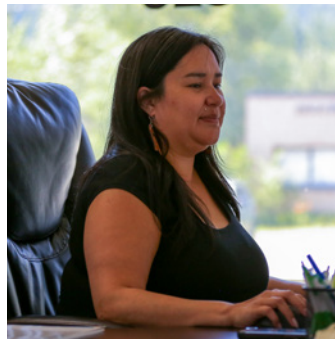

As Cedar's Training & Employment Lead, Tara plays a pivotal role in advancing Cedar LNG's long-term goal of training Haisla Nation Members and local residents with the skills needed to operate the project for the long-term. Tara works closely

with Haisla Nation Employment & Training to develop programs that support Haisla and other Indigenous Members in finding a job at Cedar LNG – today and for the long-term. One of the programs Tara is most proud of is the Haisla Apprenticeship Program, which recently saw four Haisla Members kick off their training at Pembina's Prince Rupert facility.

### Megan Ross

**Field Administrator**

Based out of the Cedar LNG Field Office in Kitimat, Megan serves as Field Administrator, working hard to keep day-to-day operations running seamlessly. She provides essential on-site administrative support to our crews and assists with events and

community outreach, making her a vital presence both on-site and in the wider community. A proud Haisla Member, Megan was born and raised in Kitimat and is excited to be part of implementing Haisla's goal of economic independence.

### A Project Shaped by Your Feedback

Our community feedback program provides an opportunity for community members to share input, ask questions, and have concerns addressed in a timely manner.

## Investing in What Matters Most

Giving back to the community is a fundamental value for Cedar LNG. Through our Community Investment Program, we have awarded more than \$500,000 to initiatives across northwestern B.C., supporting projects that advance health, education, and long-term community resilience.

In March, we were in Terrace to meet the incredible team at Ksyen Regional Hospital and learn more about the region's first Tier 3 NICU and Special Care Nursery, a critical cause Cedar LNG is proud to support. The new NICU will ensure vulnerable mothers and newborns can receive specialized care closer to home, improving health outcomes by reducing the need for emergency medical evacuations to larger cities.

“We believe strong communities begin with healthy families,” said Craig Day, Project Director, Cedar LNG. “Our contribution toward the first Tier 3 NICU in northwestern B.C. reflects our commitment to ensuring mothers and newborns can receive critical care close to home.”

With a focus on supporting opportunities to improve safety, equality, and inclusion within communities, advance Indigenous reconciliation, and drive environmental sustainability, Cedar LNG aims to support the growth of sustainable communities. Congratulations to Ksyen Regional Hospital and the region on this important milestone!

## Cedar LNG in the Community

Our team hosted a project update for the Haisla community, providing information on project progress, employment opportunities, and more. Thank you to everyone who stopped by!

Cedar LNG team member Shawn Roth meets with Manon Joice of the Northern First Nations Alliance to tour the new Red Road North Recovery Centre, where we presented a donation as part of our Community Investment Program.

In April, we attended the Haisla Job Fair in Haisla Village. It was great to connect with so many Members and share information on jobs and other related project updates.

## Let's Stay Connected

We look forward to continuing our work together as we move Cedar LNG forward. Reach out with any questions or feedback for the Cedar LNG Team:
